CPSI Rural ACO Program, Powered by Caravan Health

Find Your Place With The CPSI Rural Accountable Care Organization Program Powered By Caravan Health.

CPSI and Caravan Health are your partners in value-based care.

Driving innovation in community healthcare

CPSI has been a leading provider of community healthcare solutions and services for nearly 40 years and is now bringing its leadership and experience to the value-based care arena through a strategic partnership with Caravan Health. Caravan Health is the market leader in rural Accountable Care Organizations (ACOs) and value-based reimbursement models. CPSI and our family of companies are focused on creating innovative solutions that will help improve the health and vitality of your community, which is why we have announced the launch of the CPSI Rural ACO Program, Powered by Caravan Health.

This ACO program removes barriers that have made it difficult to transition to value-based care in the past. Join the CPSI Rural ACO Program and we will help you take the next step towards improving quality, lowering healthcare costs and increasing revenue.

The details:

- **Minimize ACO Participation Costs**
Through this partnership, we are able to reduce typical ACO program expenses with a forgivable loan repaid through your shared savings. CPSI will loan you 50% of your application fee and 40% of your ongoing costs so that you will only have to pay a \$5,000 application fee and \$3 per member per month (PMPM). On average, the shared savings for rural ACO participants exceeds \$10 PMPM, more than offsetting the cost.
- **Ongoing Training and Tools**
Caravan Health has the proven track record showing that they can tailor the training and tools needed to excel in the value-based care setting.

The proof is in the numbers:

- CPSI solutions are employed by more than 4,600 acute, post-acute and ambulatory facilities nationwide
- Caravan Health has 23 successful Medicare Shared Savings Programs in 32 states, supporting more than 17,000 independent primary care providers
- Centers for Medicare & Medicaid Services most recent data shows that Caravan Health achieved shared savings that were 257% greater than the national average

The Time for Change is Now

The CPSI Rural ACO Program removes the barriers hospitals and providers face when moving to value-based care by providing the funds, tools and training needed to be successful. The combination of two industry-leading organizations ensures your facility – and your community – will see the value in value-based care.
